Needs and Uses:

During the years preceding the 2020 Census, the Census Bureau is pursuing its commitment to reducing the cost of conducting the census while maintaining the quality of the results. The 2018 End-to-End Census Test is the last major test before the 2020 Census and will validate that the 2020 Census design is ready for production from a system, operational and architectural perspective. The Address Canvassing operation is the first operation in the 2018 End-to-End Census Test, with field activity beginning in the summer of 2017. The purpose of the Address Canvassing operation is (1) to deliver a complete and accurate address list and spatial database for enumeration and tabulation,

and (2) to determine the type and address characteristics for each living quarter. The

Address Canvassing operation consists of two major components: In-Office Address

Canvassing and In-Field Address Canvassing. Only the latter component involves

collection of information from residents at their living quarters.

The following objectives are crucial to a successful Address Canvassing operation:

- Test the listing and mapping capabilities required by In-Field Address Canvassing
- Validate the creation of In-Field Address Canvassing workload by In-Office Address Canvassing.
- Conduct a listing quality control operation during In-Field Address Canvassing.

The results of this test will inform the Census Bureau's final preparations for the Address

Canvassing Operation in advance of the 2020 Census.

Affected Public: Individuals or Households

Frequency: One time

Respondent's Obligation: Mandatory

Legal Authority: Title 13, United States Code, Sections 141 and 193
